Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Locati et al. (5,651,698) in view of Rath (5,302,067).

Locati et al. discloses a coaxial connector, comprising : a connector body 40 connected to a rear clamp nut 10; wherein the connector body 40 and the rear clamp nut 10 are connected via a plurality of single threads.

However, Locati et al. does not disclose that the threads are interleaved concentric threads for advancing the rear clamp nut 10 twice as far per revolution as a single thread.

Rath discloses the multiple interleaved concentric threads in fig. 1, column 2, lines 31-43, for advancing the fastener twice as far per revolution as a single thread.

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Locati et al. invention by constructing the threaded portion as disclosed by Rath in order to reduce assembling time.

Response to Arguments

3. Applicant's arguments with respect to claims 19 and 20 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

4. Claims 1-18 are allowed.
5. Claims 21-26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. The following is a statement of reasons for the indication of allowable subject matter: In regard to claims 1, 21, the prior art fails to provide, teach or suggest the cutting edge at the second inner diameter operating to cut and separate the sheath from the outer conductor as the cable is inserted into the bore and rotated. In regard to claims 10, 22, the prior art fails to provide, teach or suggest the complementary protrusions of the first ring and the second ring interact whereby the connector body is coupled to the inner coupling sleeve during rotation of the connector body via application of a torque below a threshold level.
